Profile

Software engineer with nine years of experience in the .NET ecosystem. I currently lead development of a configurable Umbraco CMS template that powers twelve production websites for ten global automotive brands across seven markets, and I am the lead backend engineer on the SaaS platform used to deploy and manage those sites. Before this I worked on enterprise SaaS healthcare software in Australia as an L3 engineer, and spent eight years modernizing university systems in the Philippines, including replacing a legacy LAN enrollment system with an online self-service platform. I care about clean architecture, maintainable code, and shipping things people actually use.

Technical Skills

Backend · C#, .NET 8 / .NET Core, ASP.NET MVC, Web Forms, VB.NET, Java, Entity Framework Core, NHibernate, Dapper, REST & SOAP APIs, microservices, modular development

Frontend · JavaScript, TypeScript, React, Vue.js, Knockout.js, Kendo UI, jQuery, Tailwind CSS, SCSS, Vite

Data · MS SQL, PostgreSQL, MySQL, SQLite, Redis

Cloud & DevOps · Azure, AKS, Docker, GitHub Actions, CI/CD

CMS · Umbraco 13, Orchard Core, WordPress

AI Engineering · Claude Code, OpenAI & Anthropic APIs, GitHub Copilot, Codex

Practice · OOP, SOLID, clean architecture, SDLC, technical design & peer code review, root-cause analysis, mentoring

Employment History

Senior Full-Stack .NET Engineer

Inchcape Digital · Ortigas Center, Pasig, Metro Manila

Jan 2024 – April 2026

- Lead development of a configurable Umbraco 13 CMS template that lets development teams and content editors launch and manage branded sites per market independently. It currently powers twelve production sites for ten automotive brands across seven markets.
- Serve as lead backend engineer on a SaaS deployment platform that streamlines delivery and management of newly built CMS websites.
- Guide and mentor junior engineers, and encourage the team to follow the SDLC, apply proven design principles, keep coding standards high, and take part in peer code reviews.
- Maintain legacy websites and improve their performance, scalability, and maintainability by modernizing their architecture.

.NET Core · C# · Umbraco 13 · EF Core · MS SQL · PostgreSQL · React · TypeScript · Tailwind · Azure · AKS · Docker · GitHub Actions

L3 Support Engineer / Full-Stack .NET Developer

Global Health Limited · Melbourne, VIC, Australia (contract)

Oct 2022 – Sep 2024

- Supported and enhanced MasterCare+, a cloud-based SaaS healthcare platform used by healthcare organizations across Australia. It covers electronic medical records, patient management, appointments, referrals, clinical documentation, secure messaging, and regulatory reporting.
- Investigated complex application defects and production incidents, performed root-cause analysis, and implemented fixes that improved system stability and performance.
- Developed new features across the application stack while following the SDLC, including technical design reviews, peer code reviews, testing, and controlled production releases.

C# · Java · MVC · NHibernate · MS SQL · Redis · REST & SOAP APIs · Kendo UI · Knockout.js · Vue.js

Software Developer (Technical Consultant, Programmer, Junior Programmer)

University of Nueva Caceres · Naga City, Philippines

Jun 2017 – Jun 2025

- Modernized the university's legacy LAN-based enrollment system into UNC OES, a web platform that takes students from admission and application through subject enrollment, payment, and official registration.
- Integrated payment gateways, Salesforce CRM, and other third-party services to automate data exchange between departments.
- Built business-critical systems that are still in daily use, including an HR biometric attendance system for employee time records and an RFID identification system with automated SMS notifications.
- Started as Junior Programmer in 2017, promoted to Programmer in 2019, then stayed on part-time as Technical Consultant from 2022 to 2025 to maintain and extend the systems I built during my tenure.

C# · VB.NET · ASP.NET Web Forms · Win Forms · MS SQL · Dapper · REST API · Salesforce · RFID · Biometrics · SMS API

Education

Bachelor of Science in Computer Science

University of Nueva Caceres, Naga City · 2014 – 2017

Certifications & Training

Microsoft Certified: Azure Fundamentals (AZ-900). Microsoft, Jun 2025.
Credential 6155F6689B55C729

Azure Fundamentals AZ-900. The Knowledge Academy, Jan 2025

Microsoft Windows Server 2016 Training. Installation and Storage, Networking, Identity. Pasig City, May 2019

Cisco Certified Network Associate v3 (200-125) Training. Pasig City, Jun 2019

Penetration Testing with Ethical Hacking Training. Pasig City, Jun 2019

Awards

Outstanding Achievement Award (Team). University of Nueva Caceres, Jul 2021
Academic Team Support, Individual Category. University of Nueva Caceres, Aug 2021
